

# KenyaEMR Upgrade SOP

Last updated: 2<sup>nd</sup> Aug 2021

<b>Objectives:</b>	To maintain and keep the KenyaEMR implementation up to date
<b>Task:</b>	To successfully perform KenyaEMR upgrade at the facility level
<b>Target Audience:</b>	System Admins, HRIO, EMR Champions
<b>Required Materials:</b>	Reliable internet, External Drive, Upgrade Package

**WARNING!** Perform a database backup before starting this upgrade process.

1. Download the new upgrade package from GitHub repository. Copy the new upgrade package to your Ubuntu desktop or Home directory

2. Open the terminal i.e. **Ctrl+Alt+t**
3. Navigate into the upgrade package folder i.e. **cd /Desktop/upgrade\_package** and hit enter.

4. Run the Upgrade script as a super user i.e.  
**sudo sh upgrade.sh**

(You will be required to supply your password and hit enter)

5. Wait for the upgrade to run to the end.

6. Run any other post upgrade script (if any). Otherwise, the process ends at this point.  
the Post Upgrade script as a super user i.e. ***sudo sh post\_upgrade.sh***

7. Wait for the upgrade to run to the end. You will have successfully upgraded KenyaEMR to the latest version

```
denno@denno: ~/Desktop/kenyaemr_17.5.1_release_30_07_2021
