

## SOP: HOW TO USE LAB MANIFEST MODULE IN KENYAEMR

Last updated: 30<sup>th</sup> August 2022

<b>TASK:</b>	Configure KenyaEMR to receive viral load results, request a viral load from the system, send the manifest and receive VL results
<b>OBJECTIVE:</b>	Allow successful return of VL results to KenyaEMR
<b>WHO:</b>	Facility Admins, Clinicians, Data Staff
<b>REQUIREMENTS:</b>	Functional KenyaEMR V. 18.0.2, Internet Connectivity
<p><b>SUMMARY:</b> To ease data exchange with regards to Viral Load and EID results return to KenyaEMR, a number of configuration steps are available from version 18.0.2 of KenyaEMR and above. The goal is to reduce manual data entry thus less transcription errors and faster turnaround time, efficiency and effectiveness.</p>	

Activity	Screenshot
<p><b>CONFIGURING KENYAEMR TO RECEIVE VIRAL LOAD RESULTS – THIS IS A ONE-OFF ADMIN FUNCTION</b></p> <p><b>Step 1:</b> Log into KenyaEMR and navigate to the Advanced Settings</p> <ul style="list-style-type: none"> <li>• Use <b>admin</b> credentials to log in to KenyaEMR</li> <li>• Click home and Select “Developer” tab</li> <li>• Click on “Legacy admin UI”</li> <li>• Click on “Advanced Settings”</li> </ul>	

**Step 3:**

Search (Ctrl+F) for the pre-defined properties. Specify property values for either CHAI or LABWARE endpoints as shown below. and configure the URLs and the following endpoints must be set correctly.

**NOTE: Please contact Palladium to obtain valid API tokens.**

List of server end-points to various reference labs in Kenya

### List of Endpoints to be set in KenyaEMR

System	Property Name	Description	Default Value
General	kemrorder.labsystem_identifier	The name of the lab system in use. MUST be set to either CHAI or LABWARE. Please note these are case sensitive	CHAI or LABWARE
	kemrorder.ssl_verification_enabled	Defines whether SSL verification is enabled. Should be set to false to disable SSL verification	Yes or No
	local.viral_load_result_end_point	End point for processing viral load results from the lab (should be	http://KenyaEMR_Server_IP:8080/openmrs/ws/rest/v1/kemrorder/labresults
	kemrorder.retry_period_for_incomplete_vl_result	Retry period after which updates for incomplete results can be checked. An empty value will default to 2 days	2 days
	kemrorder.viral_load_result_tat_in_days	The turnaround time for VL results in days. This is to avoid premature polling for results. An empty value will default to 4 days	10 days
LABWARE	labware_eid_server_api_token	API token to authenticate communication to the LABWARE EID lab system API. Contact palladium to obtain	Request from Palladium
	labware_eid_server_result_url	The URL for fetching LABWARE EID result	Refer to step 3 for specific lab URL
	labware_eid_server_url	The URL for pushing requests to the LABWARE EID server	Refer to step 3 for specific lab URL
	labware_vl_server_api_token	API token to authenticate communication to the LABWARE VL lab system API	Refer to step 3 for specific lab URL
	labware_vl_server_result_url	The URL for fetching LABWARE VL result	Refer to step 3 for specific lab URL
	labware_vl_server_url	The URL for pushing requests to the LABWARE VL server	Refer to step 3 for specific lab URL
CHAI	chai_eid_server_api_token	API token to authenticate communication to the CHAI EID lab system API. Contact Palladium to obtain	Request from Palladium
	chai_eid_server_result_url	The URL for fetching CHAI EID result	Refer to step 3 for specific lab URL
	chai_eid_server_url	The URL for pushing requests to the CHAI EID server	Refer to step 3 for specific lab URL
	chai_vl_server_api_token	API token to authenticate communication to the CHAI VL lab system API	Refer to step 3 for specific lab URL
	chai_vl_server_result_url	The URL for fetching CHAI VL result	Refer to step 3 for specific lab URL
	chai_vl_server_url	The URL for pushing requests to the CHAI VL server	Refer to step 3 for specific lab URL

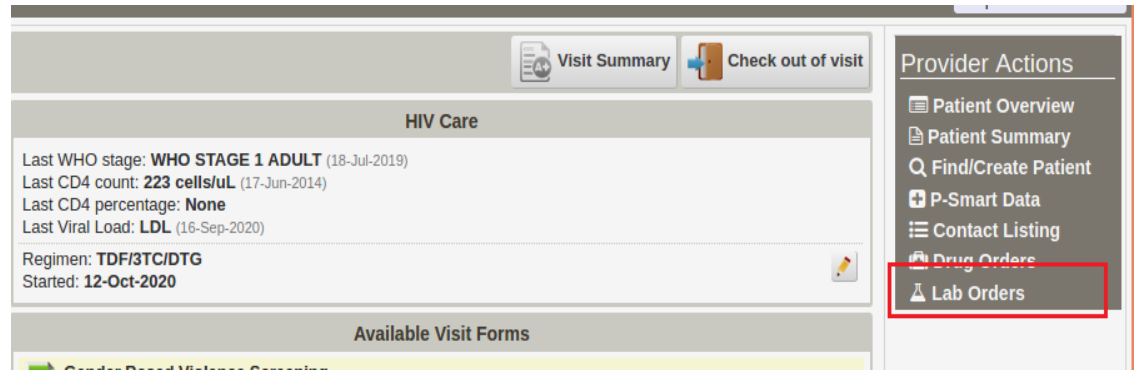

**NB:** If **kemrdorder.labsystem.identifer** property is not specified, an error message will be displayed and you will not be able to create and submit any manifest since each lab identifier expect a different set of payload.

**IMPORTANT:** Check to ensure the following schedulers are started and that the execution intervals are correctly set.

- Push Lab Requests to Lab
- Pull Viral Load results

**REQUESTING A VIRAL LOAD TEST FOR A PATIENT – THIS FUNCTION IS CONDUCTED BY CLINICIANS AND IS A ROUTINE FUNCTION**

**Step 3:** Navigate to a patient file and select Lab Orders

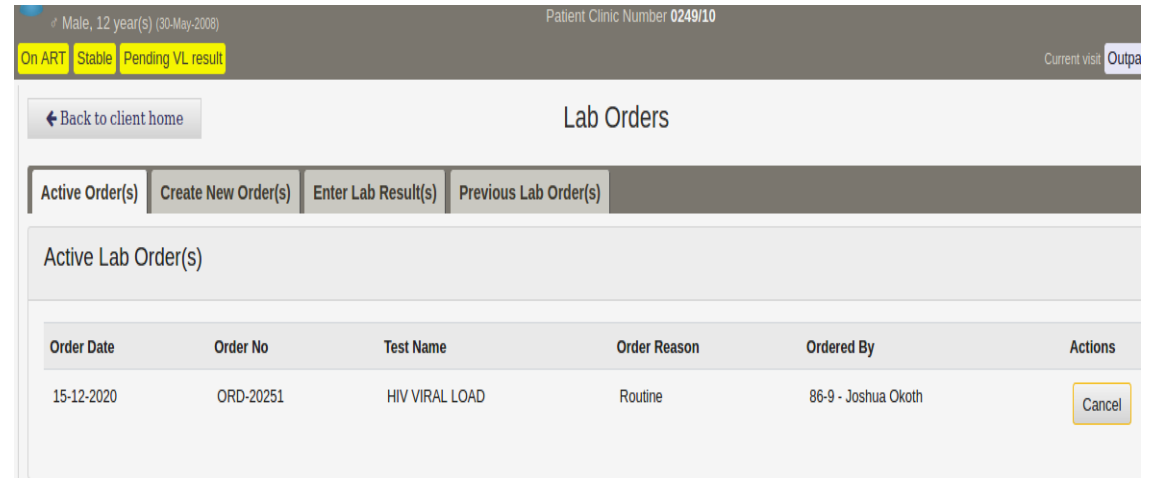

The screenshot shows a patient file interface. At the top, there are buttons for 'Visit Summary' and 'Check out of visit'. Below this is a section for 'HIV Care' with the following details:

- Last WHO stage: **WHO STAGE 1 ADULT** (18-Jul-2019)
- Last CD4 count: **223 cells/uL** (17-Jun-2014)
- Last CD4 percentage: **None**
- Last Viral Load: **LDL** (16-Sep-2020)
- Regimen: **TDF/3TC/DTG**
- Started: **12-Oct-2020**

Below the HIV Care section is a section for 'Available Visit Forms'. On the right side, there is a 'Provider Actions' menu with the following options:

- Patient Overview
- Patient Summary
- Find/Create Patient
- P-Smart Data
- Contact Listing
- Drug Orders
- Lab Orders** (highlighted with a red box)

**Step 4:** Complete the VL request and verify you have it under active orders.

The screenshot shows the 'Lab Orders' page for a patient. At the top, it displays 'Male, 12 year(s) (30-May-2008)' and 'Patient Clinic Number 0249/10'. Below this, there are status indicators: 'On ART', 'Stable', and 'Pending VL result'. A 'Back to client home' button is visible. The main heading is 'Lab Orders'. Below the heading, there are tabs for 'Active Order(s)', 'Create New Order(s)', 'Enter Lab Result(s)', and 'Previous Lab Order(s)'. The 'Active Order(s)' tab is selected, showing a table of active lab orders:

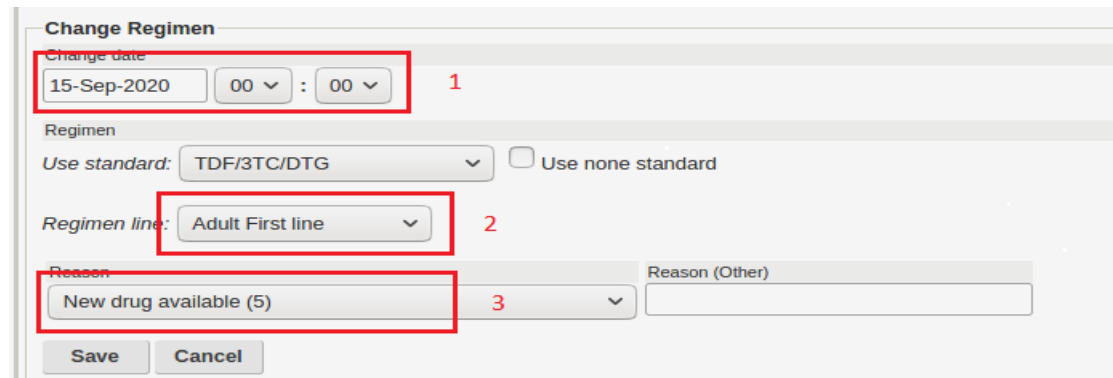

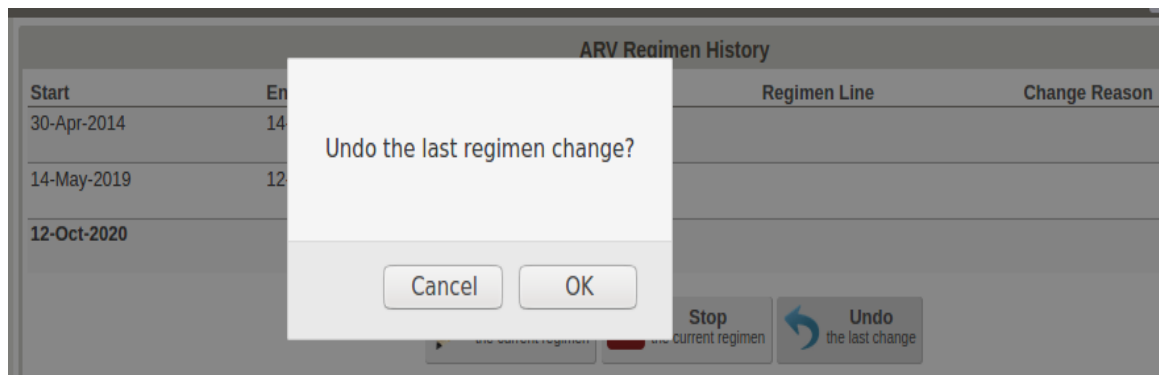

Order Date	Order No	Test Name	Order Reason	Ordered By	Actions
15-12-2020	ORD-20251	HIV VIRAL LOAD	Routine	86-9 - Joshua Okoth	Cancel

**VERIFYING AND/OR EDITING REGIMEN LINE – THIS IS A FUNCTION CONDUCTED ONLY ONCE FOR EACH PATIENT AND CAN BE DONE BY EITHER A CLINICIAN OR DATA STAFF**

**Step 5:** Navigate to the clients ARV Regimen History and Ensure the client has a regimen line. If none is available, TAKE NOTE of the current regimen then:

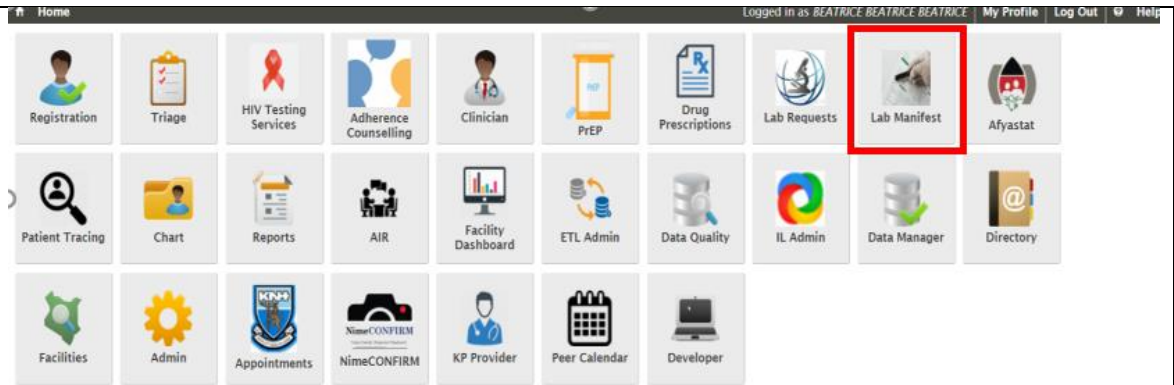

- Undo the Last Regimen Change

- Add **regimen** and be sure to input **CORRECT START DATE**, select correct **regimen line** and save.

**CREATING NEW LAB MANIFEST – THIS IS A ROUTINE FUNCTION AND CAN BE CONDUCTED BY EITHER A LAB TECH, DATA STAFF OR CLINICIAN**

**Step 6:** Navigate to Lab Manifest tab on the KenyaEMR Homepage

Click on Add New Manifest.

**Step 7:** Complete the details of the New Manifest taking into special consideration the fields:

- **Date Range** – This is the range for which you will fill Viral Load samples have been collected and for which you require results to be returned.
- **Manifest Type** – This should be set to either **Viral Load** or **IED** depending on the type of samples expected in the manifest.
- **Manifest Status** – The status should be set to “**Draft**” during the period of adding samples to the manifest. Other options are:  
*Ready to Send:* Set when all valid samples have been added and ready to be submitted.  
*On Hold:* This is set if for some reason the manifest should not be submitted yet.
- Once done, click **Create Lab Manifest** to save the manifest.
