# **HIV Care Enrollment**

While on the care panel, click on 'Program enrollment' as shown to access care programs.

Click on "Enrol" to "HIV" to enrol the client for HIV service if the client is not enrolled to HIV services and if they are "Eligible" for enrolment

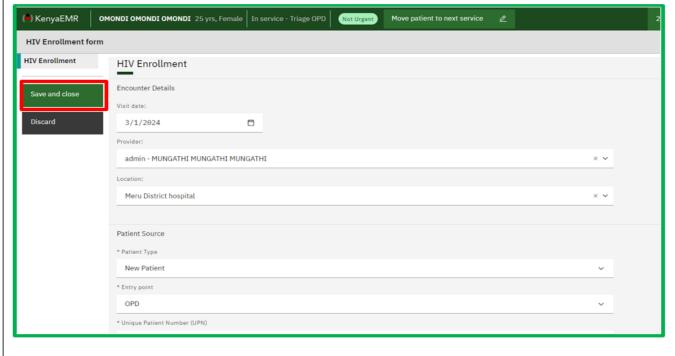

#### HIV Care Enrollment Cont.....

Once you click on 'enroll', the 'HIV Enrollment' form will open as shown.

Click "Save and Close" after filling in all the necessary fields in the enrolment form.

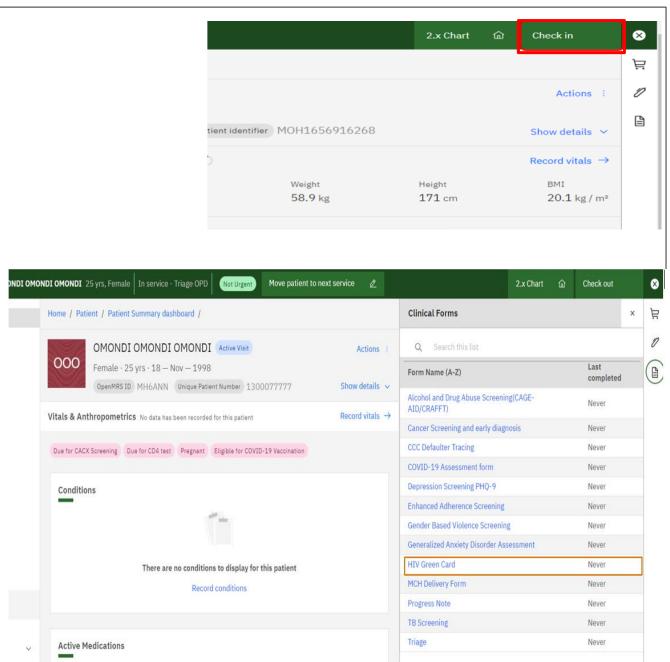

#### HIV Green Card access

Click 'Check in' the Client for service.

After check in the HIV Green card is now available under the suite of Clinical form. Click on it to open the form.

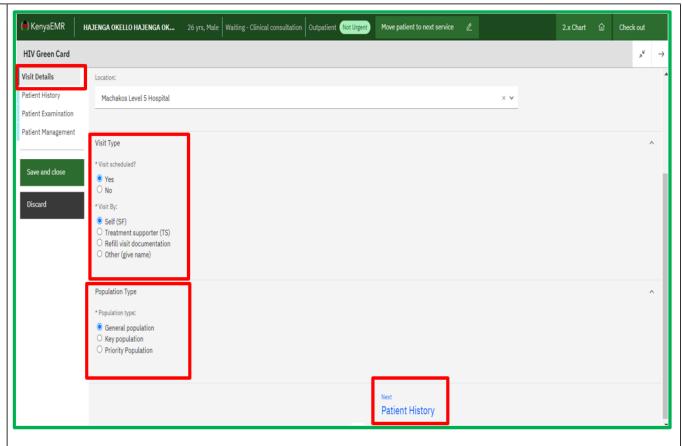

The HIV Green card is divided into 4 tabs as Highlighted below

1) Visit Details Tab documents provides information about the nature of visit and the client typology.

Fill all the questions, then click Next at the bottom of the page as highlighted.

NB: For all the questions with an asterisk means they are mandatory.

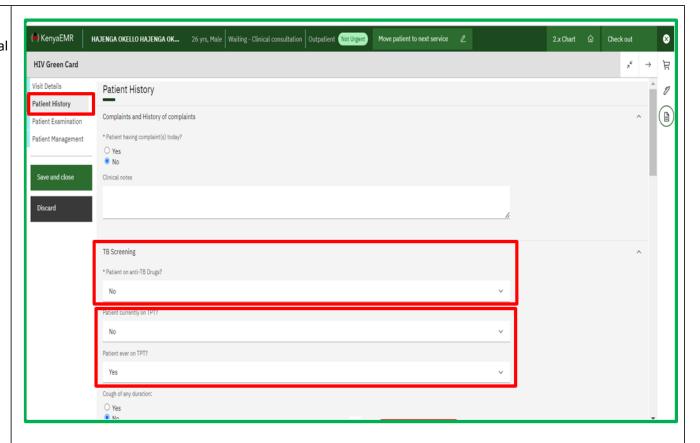

Patient History that collects the patients historical medical history that includes historical TB and IPT interventions.

# TB Screening

Select from the dropdown if on anti-TB drugs or not (Note that this is a mandatory field) one cannot move to the next field without the form

If a patient is on TB drugs the IPT field is inactivated because a patient can NOT be on TB drugs and IPT at the same time.

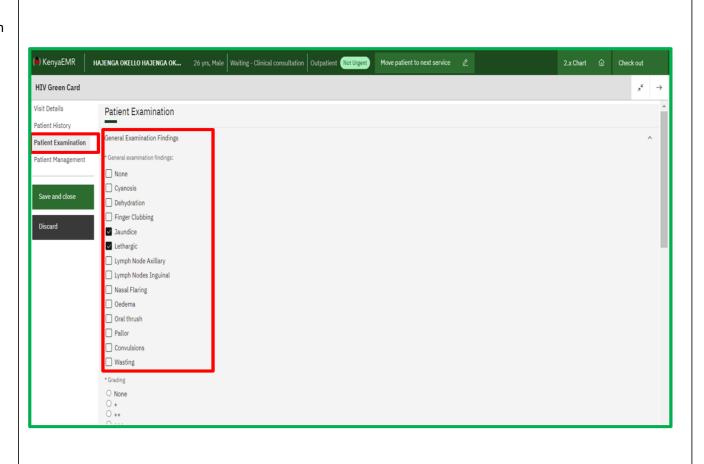

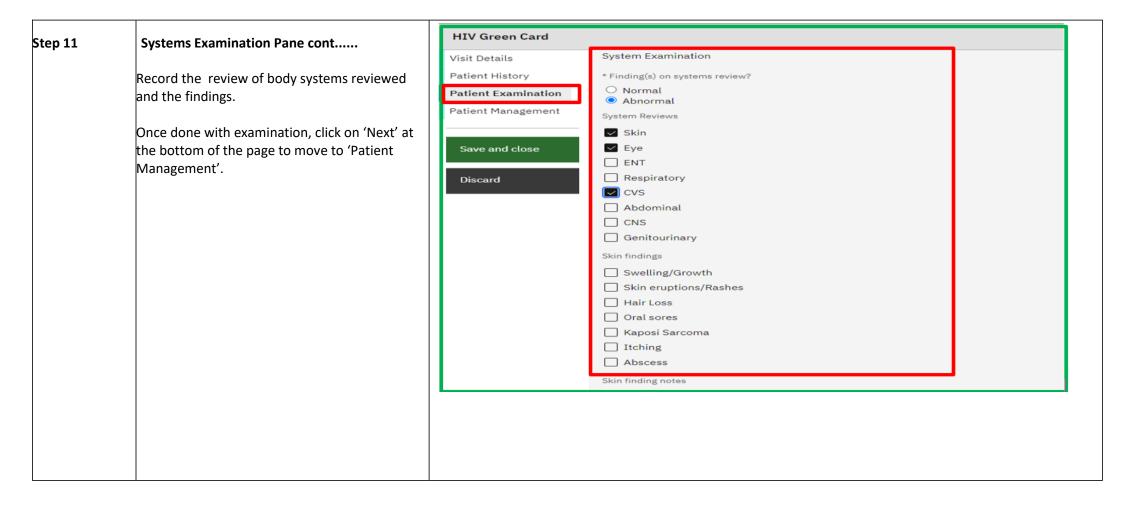

# **Step 10:**

Patient Examination that collects information on clients General, and systems review examination. The clients WHO status and diagnosis based on the ICD 11 coding is documented here.

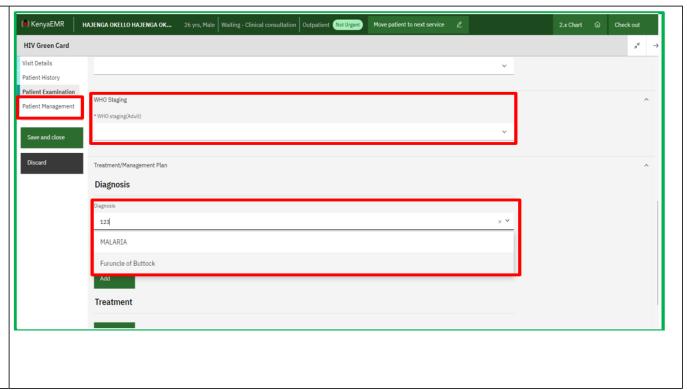

ICD 11 Coding backed diagnosis illustrated. Click on 'Add' button under Diagnosis to add patient's diagnosis. Search by typing at most more than 2 characters, suggestions will appear. Pick the correct one.

NB: You can add more than one diagnosis by clicking 'Add'.

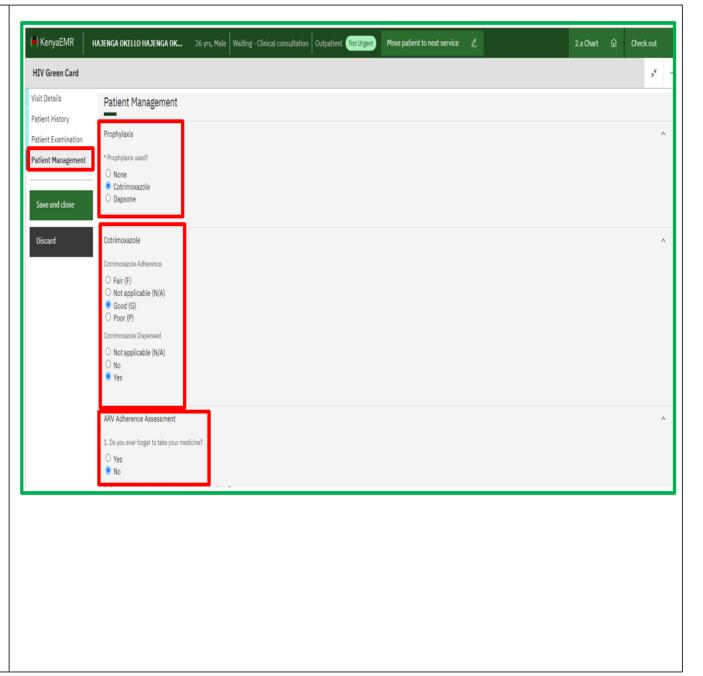

Patient Management collects information on prognosis and work up plan that has been recommended for the client. The client's adherence assessment is also assessed at this point using morisky.

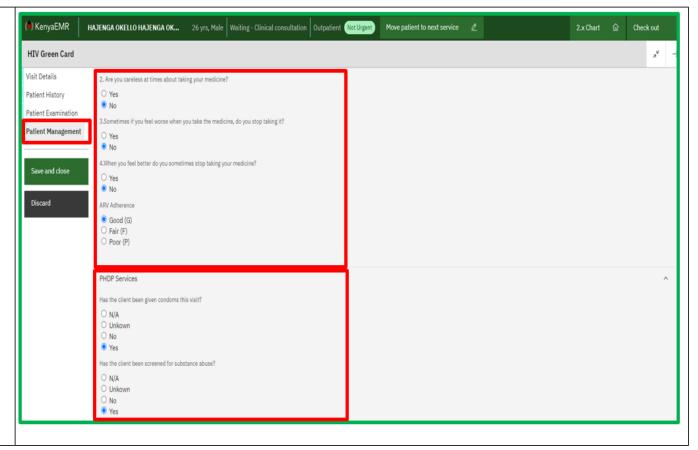

Step 14 Patient Management cont....
Assess the client for adherence using morisky.

Patient Management cont....
Record client's
establishment status then
give the next return visit date.
Save and Close Green card
to validate data captured and
to bring the encounter to
a close. Discard if you
don't want to save the changes.
Move patient to next service
to end Clinical encounter.
