

## **SOP: TaifaCare e-Claims processing**

(Last update: August 2025)

TASK:	To guide users on how to navigate & process eclaims in TaifaCare
OBJECTIVE:	Effectively process insurance claims within a facility.
WHO:	Finance Department, Billing Cashier
REQUIRED MATERIALS:	Functional TaifaCare Version 19.2.0 and above, Facility SHA Token Configuration
CLIB 48 4 A DV	

## **SUMMARY:**

The e-claim processing feature in TaifaCare allows facilities to comfortably process insurance claims and the captured information shared from TaifaCare to the insurance databases through the HIE system.

The workflow described in this user guide assumes that all bills are generated from the respective service points and that all claims are processed at the hospital's central Finance Unit for insurance payments.

It should be noted that for e-claims to be achieved from TaiafaCare, the facility EMR must be configured with the correct Token that grants facility access to the Social Health Authority (SHA) portal via the Health Information Exchange protocol.

- II. Once the form is opened, fill in the form with the required information. Key areas that must be completed for the processing claims:
  - Document presenting complaints as highlighted
  - Document Clinical & Final Diagnosis

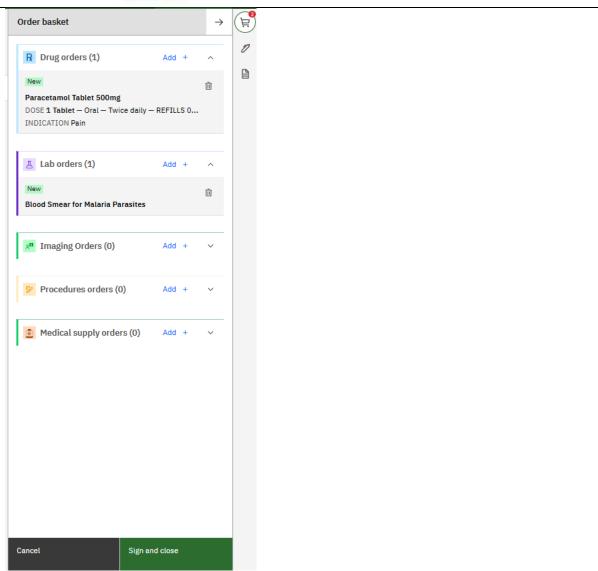

- 3 I. After completing the clinical Encounter Form, open the order basket and complete the orders given to the client for that visit.
  - Complete a Lab order for any ordered lab test
  - Complete a drug order for any prescribed drug then save and close

Note: These two orders will generate a bill that can be accessed either from the patient's profile or the billing module

**NB:** Refer to the Lab Order SOP and Drug Orders SOP for a detailed explanation on conducting the two in TaifaCare
